

KA UN 8 Angled Screwdriver for allen head screws 8mm, 1kV/ AUS

1000V ISOLATED UNBRACO. According to IEC 60900 Insulated tool with two-coloured and double-insulated handle for work on voltage up to 1000 V (AC). Visible insulation is red PVC in an anti-slip design that provides a good and secure working grip. When the insulation is damaged, layer 2 becomes visible (yellow colour), the tool is then no longer approved as an AUS tool. All tools are individually tested and labeled accordingly. Made in chrome vanadium steel.

Angle / L-wrench, allen for internal hexagon.
Inner hexagon: 4 mm
Length: 130 mm
